

Technology and Innovation in Legal Services

27 July 2021

Watch our virtual presentation, followed by a live Q&A, to mark the publication of our new research into the use of technology and innovation in legal services.

Conducted by the University of Oxford, the 'Technology and Innovation in Legal Services' research looks at current and emerging innovations and uses of technology in the legal sector. It considers potential future developments, opportunities and barriers and law firms have used innovation to adapt to the Covid-19 pandemic.

As well as short presentations from the SRA and the University of Oxford, the event will feature a live Q&A where you can put your questions to the expert panel.
